Continuing Education Lessons:

Take learning one step further

Enhance your clinical knowledge on a broad range of topics with free CCCEP accredited CE lessons developed in partnership with Pharmacy Practice magazine. Go one step further and deepen your understanding of the topics with carefully selected bonus materials that complement the CE lesson at hand.

- Browse articles authored by accomplished healthcare professionals, related to the CE topic.
- Get Patient Fact sheets, with practical tips and tools on a variety of topics in our Quick Health Guides or by accessing our Drug and Condition Library.
- Find links to additional print and video materials designed to further expand your understanding of the monthly topic.
- Enjoy access to exclusive CE content available only at the Mylan Learning Centre. Topics currently available: Managing Major Depressive Disorder and Alzheimer's Disease and other Dementias. Both are available in English and French.

Your One-stop Learning Experience:

Continuing Education Lesson Archives

Delve into previous months' lessons and accumulate additional CE credits. Our archives allow instant access to 33 fully accreditable lessons on a variety of subjects allowing you to easily meet your credit requirements for the year. Clinical and practice-based lessons are available.

Patient Information Made Easy:

Quick Health Guides and The Drug and Condition Library

In this age of universal access to the Internet, patients are more curious and proactive than ever about their health. The Mylan Learning Centre helps you respond quickly and accurately to patients' queries. Offer your patients the benefit of well-written, informative fact sheets on medical conditions, including sections on Causes, Symptoms, Diagnosis, and Treatment and Prevention.

- The Quick Health Guides contains easy-to-understand patient information on health topics of concern to the general public.
- The on-line Drug Library allows you to browse through health topics and corresponding medications from A to Z.

Mylan Centre for Collaborative Care:

An Integrated Approach to Healthcare in Canada

Enjoy a series of six interactive Webisodes focusing on the challenges facing Canadian pharmacists today: how to build a practice; develop a loyal clientele; foster positive relationships with patients, physicians and other healthcare professionals; and develop good business practices. The series highlights the pharmacist as an integral part of the healthcare community.
